

Packaging & Supply Chain Audit Questionnaire

Packaging serves multiple purposes and has many touchpoints throughout the supply chain. In order to develop a high-performing packaging solution, it is important to gather as much data as possible about the existing packaging program.

The below questions are a good starting point in evaluating your packaging:

Is there an established packaging vendor guide?

Yes No

When was the last time it was reviewed / modified?

What packaging challenges or problems are you experiencing?

Little control over packaging supply chain

Freight or operational costs too high

Dissatisfied with packaging design

Worried about product damage or return rates

Need to improve packaging sustainability

Lack of transparency into manufacturer-sourced packaging

Unhappy with packaging quality

Other

How is packaging being sourced currently?

What size container is used for shipping from OEM/factory to DC?

40', 40HC, 53 Air freight

Number of containers shipped annually?

Number of SKUs being manufactured:

What is the container utilization rate %?

%

DC operations and sorting?

Manual

Automated

Number of OEM/factories?

Cross dock %

%

Location of OEM/factories?

Full case pick %

%

Types of products:
